SIC moves on Student Housing Service Code

by Grif Boyce
Staff Writer

The Summer Interim Committee rolled through business quickly Tuesday, and in so doing passed a needed service into a coded reality. The Student Housing Service Code was approved after a minor revision of the original proposal. This now makes it possible for the Student Housing office to reap the benefits of being an ASI recognized organization.

In time this group will provide the students with a comprehensive housing guide to renting and leasing in the San Luis Obispo area. Other plans proposed by this new service are: a model lease, deposit information, and advice con-

cerning the legality of contracts and landlord rights. The goal of the group is to better landlord-tenant relations.

No new developments occurred regarding the ASSIST evaluations for the Fall Quarter. Plans for the day care center are being refined before final approval of SIC.

Pre-season meals for the football team which had been budgeted to receive \$7,600 was the topic of a lengthy discussion at the meeting. Coach Joe Harper reviewed the football team's financial status over a five year period. Representatives of the Dining Hall explained that the meals served to the gridiron teams totaled 6000-8000 calories each. This figure represents about three times the amount of calories in a normal daily meal.

Few members questioned the amount or necessity for this expenditure. No vote was taken, therefore, the original \$7,600 allotment will pay for the pre-season meals.

The final item of business before the Interim Committee was a suggestion by Don Tukto, Mustang Daily business manager, to pay the summer editor a \$45 a month salary. During the regular school year the editor receives \$100 a month for his services. Since one summer issue is equal in content to several daily editions it was felt by the members that this was a fair expenditure. It was agreed this matter will be settled in committee. Indications were that the summer editor would receive the \$45 a month requested by Mr. Tukto.

Free concert draws raves

by Pat Thomson
Staff Writer

What makes loud noises, imitates hundreds of other novice rock bands and has a fruity name? Don't guess too long, the effort isn't worth it.

A local rock group named Apricot opened the first of a series of four Concert Under the Stars last Sunday night. The idea behind the concerts was a good one. Unfortunately, the opening-night performers weren't.

Approximately 150 people attended the out-of-door concert held behind the College Theater. Everyone seemed to enjoy themselves with the dogs romping on the lawn and the various games of frisbee being played.

It was a comfortably cool evening when it began at 6 p.m. However, by 8 p.m. people were getting off the blankets they had brought to sit on and were putting them over themselves to keep warm.

Apricot performed for about an hour. They were interesting, if nothing else. They managed to get the songs started and ended at the same time but during the tunes there seemed to be little accord.

The group substituted shrieking, repeated verses and a lot of drums for talent. They kept a beat so the toe-tappers of the audience were satisfied, but that was about the extent of their success with some good rock tunes.

Apricot was followed by a soloist named John Zane.

Although personable on stage—when a young Irish setter came on stage with him his comment was "now you have two red-heads entertaining you"—he seemed too anxious about his performing abilities.

With a voice reminiscent of early Glen Campbell, Zane banged out a few songs, two with local interest. The "VW Blues" and a song about venereal disease in the Architecture Department were given a lot of voice and guitar, excessively at times.

Zane tried. With a little more exposure he may become very popular around San Luis Obispo.

The redeeming spot of the evening, however, came with the next performance of guitar picking, twangy voiced Greg Carr.

Carr had a natural feel for the songs he performed. "Windin' Boy Blues" featured a lot of good guitar playing and singing. His light, happy songs were easily heard without the extensive amplification that seems so popular today. Hopefully, future concert performers will keep this in mind.

The next Concert Under the Stars is scheduled for Sunday night, July 25 at 6 p.m. A fellow staff member says the performers are all good.

Good, bad, or just plain fair, the next concerts are bound to be successes. The evenings and the fun of being out-of-doors with friends is enough to bring a fairly good sized audience to these free music fests.

Students designs cost-cutting blood machine

Two machines that will greatly reduce the cost of operation at the Tri-Counties Blood Bank, have been designed and built by a student here.

Fred Hollis, of San Mateo, a 24-year old senior majoring in industrial technology, recently constructed two agglomeration cell-washing machines — more commonly known as blood reconstituting machines — as an answer to a need expressed by the Santa Barbara based bank.

Purpose of the machine is to take frozen red blood cells that have previously been separated from white cells and, with the aid of a saline solution mixed with glycerine, reconstitute the whole blood cell. This is a necessary

process since blood in its whole state will last no longer than 21 days. Separation enables the red cells to live up to five years and at any time during that period the cells may be reconstituted with the aid of the machine.

Hollis, along with his faculty advisor, Ray Wysock, began designing the machine for a drawing assignment in a general metals class Fall Quarter, 1970. Actual construction began during the following quarter and was completed this May as part of a special problems project for the Industrial Technology Department.

First developed six to seven years ago, blood reconstituting machines sold for approximately

\$10,000. Today the cost has been reduced to \$350-\$400 on the average. The two machines constructed here were built for approximately \$50 apiece.

"This little machine takes the place of the \$10,000 machine," said Dr. Laurence L. McLellan, medical director of the TriCounties Blood Bank.

"It makes it possible to level out the peaks and valleys in blood donations," McLellan stated. "We are the only bank of our size that uses the freezing process for blood storage."

Ag workshop begins today

Young agriculturalists, 30 in all, begin a three-day seminar on "Leadership Through Communication Education" here today, Friday and Saturday.

They are participants in the Agricultural Leadership Program of the Agricultural Education Foundation. They were selected from among 115 applicants for the three-year program designed to develop leadership abilities among outstanding young farm men.

The seminar the second at Cal Poly, is the sixth in a series of seminars in the first year of the program.

In addition to seminar sessions on campus, the participants will tour the Sinton and Brown

Dehydration Plant, the Stanley Brown Feed Yard, the Union Sugar plant in the Santa Maria area, and the Pacific Gas and Electric Company's Diablo Canyon Nuclear Power Plant.

Seminar sessions will cover "Communicating Problems of Waste Disposal," "Goals and Problems of Education," "Problems of Handling Communications With Groups," and "Influencing People to Take Action."

Cal Poly faculty members participating in the seminar are Keith Nielsen of the Speech Department, Gordon Curzon of the English Department, and Walter Schroeder, head of the

En Garde! The Pacific Conservatory of the Performing Arts is poking the air out of many old theatre-goers as they perform nightly at Allan Hancock College in Santa Maria. This scene is one from "Hotel Paradise," one of the productions. Story is on page 8.

Camera workshop

The clicking of shutters and the popping of flash bulbs are bound to appear from every corner of this campus when the Journalism Department and the California Press Photographers Association (CPPA) co-host the first annual Image Workshop West on campus on August 20-22.

Geared for both the amateur and professional photographers, the three-day workshop is being planned to tax the abilities of its enrollees to produce high-quality, photographic results from assigned photography problems.

The workshop is being supervised by the Image West Committee, chaired by Jack Wilson, picture editor of the Santa Barbara News-Press and a

former member of the Journalism Department Staff. Other members of the committee are Jim Vestal, picture editor of the Sacramento Union; Gary Gillis, CPPA president and Sacramento Union photographer; and John Healey, head of the Journalism department.

According to Healey, anyone with an interest in photography may apply for inclusion in this summer program. However, a committee of professionals has been chosen to evaluate all applicants and to narrow final enrollment in the program to 30. Applicants will be accepted, in part, on the basis of three 8-inch by 10-inch prints to be submitted with their applications.

Ed program planned for youth work

The Education Department of the college will provide a workshop on campus this summer and two courses at some 15 locations throughout the state over the next 12 months.

The purpose of the program is to improve the professional preparation of the teachers and others who work with the youth enrolled in work experience education programs in the state's high schools.

The project is designed to encompass four basic activities.

First is the summer workshop, running from Aug. 18-20. Its purpose will be to familiarize educators with the concept of goals and objectives for their programs.

Second, will be the training of 10 participants to serve as resource persons and teachers for the courses to be offered Fall and Spring Quarters.

Presentation in seven different cities of a course on fundamentals will be the third phase.

Fourth among the basic activities will be an advanced course in evaluation for work experience education.

Both of the courses planned for the program are being scheduled as regular courses of the college extension program. They will be worth three units of graduation credit.

Mustang

Paul Tokunaga-Editor

Thank you

Thank you very much.

Last week's Mustang carried a story entitled "Will you help a fellow man?"—a piece that attempted to conceal a plea to you to reach across the walls and touch a hand that needed help. We didn't do a very good job.

The story related the struggles of a Paso Robles family in their attempt to put life together for their 10-year-old son. It hasn't been too easy—not too easy at all. But thanks to a few that heard what the story said—Chris Christman and another boy from Atascadero with hemophilia may get another shot at this game.

Through the work of Don Tutko, Pete Evans, and Dr. Billy Mounts, next Friday, June 30, will be the day at the CU plaza will be the place where you will be given a chance to love someone constructively. An area will be set up where you can give something of yourself to help someone else. Blood for two young boys is needed. We love them enough to believe that a needle in your skin hurts less than two boys who may not...

Thank you very much.

Ringling Victory

The Communication Workers of America are back at the switchboards or installing telephones today. The 400,000 member group voted Wednesday on a new three year contract package. Ballotting will take two weeks. If at that time the members have rejected the proposal the strike will resume.

A spokesman for the strike stated that the contract did not have everything we wanted but it did represent wage and benefit increases exceeding 10 percent.

Pacific Telephone Company which employs almost 10,000 in California and Nevada, said it is computing the phone-rate increases that may be necessary to meet union demands. The Public Utilities Commission recently granted Pacific Telephone \$143 million increase in its annual rates.

The proposed contract will raise the installers top pay from \$183 a week to \$208 a week. Operators in the top pay bracket would advance from \$118 a week to \$138 a week. In addition, cost of living increases would be paid in 1972 and 1973, as determined by the consumer price index.

The strike caused little confusion or annoyance to phone users. Due partially to the automated systems and the management personnel, the line were up to par at the other end of the line.

Photo buffs

The campus Camera Club, sponsor of the College Dark Room, has announced its summer schedule.

The meetings are slated for July 27, Aug. 10, and Sept. 7. The meetings will be held in the Dark Room at 8 p.m.

Participants will be able to present their photographs and slides for the enjoyment and critique by the group. Photograph buffs are invited to attend.

Persons seeking further information should contact Dave Scott at 544-2259.

Open It Wide

What do you think of President Nixon's proposed trip to China and the good relations which might ensue?

Corrections

Apologies to Jay Featherstone, Nancy Jacob, and Carol Somers for the mix-up in the Open It Wide column last week.

by John Taves

Ray Bianchi-ABM-Sr.—I think it's a pretty good idea. The more communication the better off you are. If you don't talk, you never solve problems.

Mark Wilson-Bio Chem-Sr.—I'm not sure if he's going. If he does go, it'll be good for American Far East relationships, because we'll have a gathering of the major political representatives. If he doesn't go, it'll probably be because he won't have adequate security from anti-Americans in China.

Mary Bright-Home econ.-Jr.—Let me think . . . I think there is going to be problems with Chiang Kai Shek. I'll bet he's upset. We made a pledge to stand by them as far as the communists being intruders was concerned. But at least it will open up communication.

Bryan Adams-Arch-Sr.—I would say it's good. We can't ignore 800 million people. I think the differences between our two countries has to cease if world peace is to come about. I try to be an optimist and I think it will. I think two countries with different government forms can exist. It doesn't have to be one whole democratic system.

Trevor Spruston-Ed-Gradt.—I think it's great. You can't leave out one third of the world's population. It should have happened a long time ago. It is an opportunity to get mainland China into the U.N. It's a diplomatic coup for Nixon. It is possibly his way of phasing himself out of Nixon's war.

Justin Congdon-Bio Sci-Gradt.—I think it's late. With his past record of what he thinks of China and the communists and then to turn around and act as if it were his idea . . . I'm glad it happened, but I wish it had been a democrat.

Charles Carlin-ME-Jr.—You can't comment on it until it's happened. At least he's trying to bridge the gap.

Beverley Bentley-Bio Sci-Gradt.—I think it's a good thing. I'm glad it happened. It will help the state we're in now. It's a little late, but it's better that we recognize them now than never. I don't think it's going to affect the war in Viet Nam.

Carol Olsen-Soc. Sci-Sr.—I'm glad to see the country making good relations with people, as long as it's sincere, and not just "up front."

Mike Brady-Arch-Sr.—I think we ought to be optimistic and hopeful about it. It just might strengthen the U.N. ties. It will help the whole situation. Having all the world powers in the U.N. will be much better.

Lloyd Bastian-EL-Jr.—I think we'd be very cautious. The position that China is in right next to Russia is important. They have 800,000 troops there now. They need an insurance policy. I don't know if we wanna be their insurance.

Mike Caskey-NRM-Fr.—I think it might work out, but I doubt it. Nixon's foreign relations, so far, haven't been that successful. He's tried, but everything has flopped.

Jane Hill-Soc. Sci-Sr.—I think it's good he's going. I don't know, in a way it seems kind of phoney. I don't know about his motives or if they're telling us all. Kissinger was so secretive I don't think the people of China will be glad to see him.

Jeri Brandt-Home Ec.-Jr.—I think it's really neat. But I wish he'd hurry up and get over there.

Anton Dickerson-Horticulture-Jr.—I was totally unaware that he had made any such plans. Don't think I'm from outer space. I've just had my head in a lot of books.

Charley Beeth-Busi-Sr.—I think it's great. I feel that perhaps the greatest threat to world peace is in not being able to communicate, and certainly we haven't been communicating with Red China the past twenty years.

Lawmakers ban bikes

Out of the office of 29th district Assemblyman William Ketchum, San Luis Obispo and Tulare Counties comes the announcement that last week the legislative Joint Rules Committee ascended to new legislative heights. They have banned the parking of bicycles in

the Capitol garage.

At a time when we are presumably encouraging the removal of as many cars from the highways as possible this action encourages questioning. Some members and many staff people ride bikes to work. Bike theft being what it is, the cyclists

have parked their bikes in the garage inconveniencing no one.

It seems that with all the problems confronting the legislature the Rules Committee should certainly find more important items to occupy their time.

CTA fights budget cut

Governor Reagan's \$78 million veto of State Teacher Retirement System (STRS) funds threatens a cutoff of monthly checks for some 43,000 retired California teachers in about five months, according to findings of the California Teachers Association (CTA).

L. Gordon Bittle president of the 178,000-member CTA, declared "It is unthinkable that the governor of the State of California would jeopardize retirement income of teachers who have served the state for 30 to 40 years in order to provide a phony budget balancing scheme. Some 8,000 of these teachers are getting only \$40 to \$200 a month in retirement income."

Bittle stressed that the CTA is exploring every legal avenue to force the governor to live up to the state's contractual obligations to the retired teachers.

He pointed out that the Legislature, aware of the states

responsibility to contribute to the retirement fund, appropriated \$98 million. This was apparently cut to \$20 million by the governor; according to the CTA, in an effort to force the STRS board to make up the difference—\$78 million—from its contingency fund.

Bittle added that the quickest and most effective way to solve the problem would be for the Legislature to stick to its original concept of the state's obligation to the retired teachers and override the governor's veto on this single item—by restoring the \$79 million contractual obligation and legally fixed charge to the budget.

According to Bittle, the \$78 million does not represent an increase in retirement allowances. It merely meets the current inadequate allowances, which have not been raised for several years in spite of inflation.

The San Luis Obispo Mozart Festival Age String Quartet, above, a musical group to be held in August will feature the New now associated with Fresno State College.

New Age String Quartet

They are young, talented and versatile. They play everything from modern to Avant Garde to very traditional. Who are they?

They are the New Age String Quartet, a featured group on Saturday night of the three-day

San Luis Obispo Mozart Festival in August.

Associated with Fresno State College the group has been playing together for the last four years. Under the direction of Albert Gillis they have become

well-known on the West Coast.

The SLO Mozart Festival will feature some of the best orchestration on the West Coast. The New Age String Quartet will certainly be at home with the other well-known performers.

Cultures viewed

Intercultural communications workshop is a form of group counseling offered at this college by the Counseling Center on Thursdays from 3 p.m. to 5 p.m. in CU 218. The objective of this group is to increase a person's awareness of the cultural influences on human values and behavior and to experience a breaking through of the barriers to communication and interpersonal relations.

The subjects of discussion center on those universal experiences that all people share—friendship, family patterns, male-female relations, prejudice and intergroup relations,

education, leadership styles, and the like.

Unlike a sensitivity group, the intercultural communications workshop focuses more on cultural and less on personal aspects of behavior. The group will be limited to 14 persons and will include several students from foreign countries.

Persons interested in becoming part of a group of this type may seek further information at the Counseling Center (Room 211 in the Administration building) or by calling 546-2511. Dr. Richard Miller, counselor at the center, will be advising the group.

Monday—a 'good' day

If Monday mornings have been a drag for you in the past, then this is to announce that things are looking up.

From 9:30 a.m. to 11 a.m. on Mondays you can relax under the trees in the Archie Patio while sipping coffee and enjoying pleasant conversation with fellow would-be sufferers.

Coffee is free—drink as much as you like—and donuts are a dime each.

Truth book

A handbook for teaching morals and religion in public schools got the okay from the State Board of Education. At the July 8-9 meeting of the Board the go ahead was given to a citizens committee to start preparation of the handbook.

"If the young people," said John Kehoe, legislative secretary to Governor Reagan, "have the opportunity to learn truth, justice, morality and patriotism...we will not have these young people with love beads pursuing peace with violence."

"Our experience is that there is a great hunger among young people to learn about religion," added Kehoe.

The State Board of Education agreed to provide at least \$17,000 to have 200,000 copies of the morality handbook designed, written and printed.

The citizens committee has

been working for the past year as a way of putting into the classroom the combined effort of two groups who studied and developed guidelines for moral responsibility.

The first set of guidelines was considered too controversial and was refused by the Board. A later set of guidelines, written by a committee headed by State Board Member Donn Moorman was accepted.

The handbook will be taught in elementary and secondary schools throughout California. State Board of Education Member Jeannie Ritchie of Menlo Park, suggested, "for school children, not just those in the kindergarten through high school grades should be included."

The Board will review a preliminary draft of the handbook and the teacher training material before it is adopted.

ASI VICE-PRES.

How important is it to know her?

by Jeanne Wiles
Staff Writer

Marianne Doshi couldn't understand why she was being interviewed. "Why not interview someone who has already contributed something—like Bernadette Devlin or Rev. Charles Koen?" she asked.

That forced me to do some reconsidering. How important was it to the student body to know their ASI vice-president as a person? Another question also presented itself. How much was she willing to reveal?

At the beginning of our conversation the barefoot girl in a long cotton gown made it clear that she wished to keep her private life private. Not because she had anything to hide—simply because she wanted it that way.

Mrs. Navnit Doshi is an ornamental horticulture major with a two and a half-year-old daughter and some very definite political opinions.

She ran for ASI vice-president and won last May "to further the

Has very definite political opinions.

efforts of student rights and to help make their years at Poly more meaningful to them (the students)."

She and ASI President Pete Evans had worked together in the Student Tenants Association (STA) over a year prior to running for office. Both had become aware of many problems facing students here and, rather than working for change from the bottom up decided to work for it from the top down. Believing there was strength in numbers, Marianne explained that she and Pete decided to run for office together. Originally, she said, the plan was to run a large slate of candidates with the same viewpoint.

I understood from Marianne that the idea was not for "a bunch of radicals to take over the school," rather to find the most effective way to efficiently bring about student-oriented changes, such as housing and legal-aid offices, and a day-care center.

Originally from Topeka, Marianne has travelled most

photo by Phil Bromund

Sitting beside her daughter, ASI vice-president Marianne Doshi, contemplates the role of womanhood—"pretty much and individual thing."

recently to England, Thailand, Malaysia, and India. She lived one half year in Malaysia and India on "a sort of extended vacation." She says next she would like to visit South America.

Marianne has been attending this school for two and a half years. Prior to coming here she spent two years at Reed College in Portland, Ore., then worked for a while.

I asked the female vice-president what her views were on the woman in her traditional role as housekeeper. "I think that the original tasks that women had have been rendered useless by technological advances. No person should have to do something that that person doesn't see the relevance in." Mrs. Doshi did not express a

Not "a bunch of radicals" taking over the school.

particular personal preference or aversion to the traditional role of the woman. She seemed to think that it was pretty much an individual thing.

Marianne did not relate any particular interests in music, literature, or art. She said she likes music, but it's "the usual thing—what everybody likes." Marianne dabbles in a variety of

porations, citing as examples Pacific, Gas, and Electric Co. and the entire auto industry.

According to Marianne, the government has lost the people's credulity. "There seems to be an ever-widening chasm between the administration of this country and the people of this country. The power is not in the people's hands," Marianne said.

"The economic system is showing itself to be defunct."

She mentioned that the poorest people (blacks and women) are the ones kept in unskilled positions and are those to be laid off first when the economy starts on a downward trend.

As Marianne sees it, the supersonic transport (SST) is a waste of money which has been proven to be uneconomical. She said that it is clear that "industry is controlling our economic domestic and foreign policy." She summed up the economic question by asking, "What good is going to the moon if we've got people starving in our backyard?"

When asked about President Kennedy, Marianne replied "I don't think being president of a college is an easy position." She said Kennedy is interested in the students' welfare, but is in a tight situation, caught between the students and the trustees. Marianne said she hopes to see a closer, more open attitude develop between students and the administration.

Having heard only rumors about Marianne's connection with Students for New Action Politics (SNAP), I asked her about that. She said, "I judge it (SNAP) by what's been done, not by the aura it has created." Marianne is not a member of

SNAP, but did speak on one occasion last year to club members. She has friends in the organization, but pointed out that she also has friends in many other campus organizations.

Marianne gave SNAP credit for being instrumental in bringing the non-retention of and dissension within the faculty to the students' attention, promoting anti-war actions, and introducing a greater variety of speakers to the students on campus.

I asked Marianne how much responsibility she thought one man had to another. She answered that he has the responsibility to the degree that he sees his relatedness to his fellow man. She said problems in the universe stem from unsettled questions within oneself. However, she feels that there definitely bond between all people.

Many times Marianne referred to the concept that people must come together as people. "If we don't, the situation is not going to get any better."

"There definitely is a bond between all people."

Not wishing to let negativism breed more negativism, Marianne says she has a lot of hope for the direction of mankind. On one level, she said, "it's happening—people are coming together in the fight to regain their rights."

Marianne believes that although all people are basically alike, they are afraid of each other. "Loving everyone in generalities is easy," she said, "but bringing it down to specifics—like you and me . . .", and that's where she trailed off.

SUNBIRD

Tempt a week encounter -

Backpacking, to the beginner, can be a very painful experience. About half the people accompanying the Outings Committee on an excursion to Jennie Lake in Sequoia National forest last weekend, found this out the hard way.

In spite of thunder and lightning, blisters, strained muscles, soggy sleeping bags, and rain and more rain, 23 people left Friday and 23 returned Sunday.

Outings Committee Summer Chairman John Engelfried explained that the weekend backpack trip is basically a friendly animal which will be raising its head again many times this summer; "depending on whoever shows up at the meetings and depending on what they want to do."

Sponsored and funded by ASI, the Outings committee exists to bring together people who like to go places and do things. "We'll do whatever the people want to do," advisor Les Griffin said.

In the past that has included trips to such places as Yosemite, Pinnacles National Monument, Disneyland, San Francisco, and even paddling canoes down the Russian River. According to Engelfried, on one occasion Spring Quarter, there were three trips going simultaneously. One group went to San Rafael wilderness, one to Redwoods National Park, while the third went hiking in Zion National Park.

Engelfried stressed the Outings organization is not a club--it is a committee. He added, "We pride ourselves on being one of the most open organizations on campus."

He said that it is not uncommon for someone to accompany the group on one trip, then not show up for another outing until six months later. People participate according to the way things fit into their schedules.

Photos and
text by
Jeanne Wiles

nd in nature Outings Club

Anyone is welcome to attend committee meetings Tues. evenings at 7 p.m. in CU 220. Usually this is where suggestions are made and a place to go is chosen for the coming weekend.

Engelfried said that this summer many of the regulars are interested in outdoors activities, so he looks forward to many camping and hiking trips.

The jaunt last weekend to the Sierras was considered to be a beginner's hike, according to Engelfried. Hiking twelve miles Saturday, and six Sunday didn't reach anybody's limit, but to one poor reporter it came pretty close.

Engelfried said that when the committee was formed, about three years ago, it nearly died because there were only a maximum of eight active members. During the regular school year, the committee meetings boast a regular attendance of over fifty.

Outings Committee tries to plan at least one activity per weekend. Transportation is provided by those members with cars, while those without share the expense of gas. Average cost for a weekend is \$3 for food and whatever the transportation costs.

This weekend the group plans two small outings. Tomorrow beginning at 5 p.m. until dark they will go horseback riding at Avila Beach. The cost is \$3.25, plus the cost of transportation. Sat. night a camp-out is planned at a local beach. Its cost is \$1.50 plus transportation.

If either of those strike an interest, sign up at the CU information desk by 9 a.m. tomorrow. Departure time and place for both outings is 5 p.m. at the TCU on their respective days.

FREE INTRODUCTORY SPEED READING LESSON

**LEARN HOW YOU CAN READ FASTER WITH
EQUAL OR BETTER COMPREHENSION.**

- You'll discover various study methods and procedures.
- This is a Special One Hour Introductory Lesson.
- You'll learn the rate of your reading speed.
- You'll actually participate in techniques that will improve your reading speed and comprehension.

We want you to decide for yourself the value of becoming a rapid reader through the use of the Evelyn Wood Reading Techniques.

For the first time we are offering a special one-hour introductory lesson to provide you with a glimpse of what it is like to be a rapid reader. You'll actually participate in the techniques that will improve your reading and comprehension. You'll find that there's no particular magic to becoming a speed reader... the real ingredient is mastering the proper techniques. Students, educators, businessmen and housewives, over 500,000 of them have mastered the Evelyn Wood method and the late President Kennedy was sufficiently convinced of its value to invite Evelyn Wood to the White House to train his staff. The only investment on your part is one hour of your time... we think that's a small price to pay for what could lead to financial profit and hours upon hours of enjoyment. Decide for yourself at a Free Introductory Lesson at the Evelyn Wood Reading Dynamics Institute.

Bike lanes override street parking

by Roe Sands
Staff Writer

Just sniff the air and you know it's all just a sign of the times.

A step to encourage more bicycles and fewer automobiles on campus will be taken this summer. Bike lanes six feet wide will be created on all of the major campus traffic arteries. Although the construction of the lanes has begun, the final touches of signs and painted curbs will not be completed until the fall quarter.

President Robert E. Kennedy approved the recommendation of the campus planning committee to get the bike lane system in operation. Kennedy authorized removal of approximately 390 temporary on-street automobile parking spaces to clear the way for the bike lanes. The lanes will provide for improved safety of bicyclists and pedestrians and will encourage greater use of bicycles by students and faculty.

E. Douglas Gerard, executive dean, and Peter K. Phillips, facilities planner, who developed the bike lane plan, ride bikes to and from campus.

Gerard said the street parking spaces created hazards for pedestrians, especially at crosswalks, and that the motorists will now be encouraged to use available parking spaces in campus lots. Some of the spaces are not as convenient as the street parking, but the bicycle lanes are definitely needed for the increasing number of cyclists on campus.

"The relatively inexpensive multi-speed bicycles and the ecological impact of motor vehicles are factors in this in-

creased use of bikes," Gerard said. "We have three times as many bikes on campus this year as last year."

The diagram at the left illustrates the areas where the lanes will be located. The darkened lines designate the lanes.

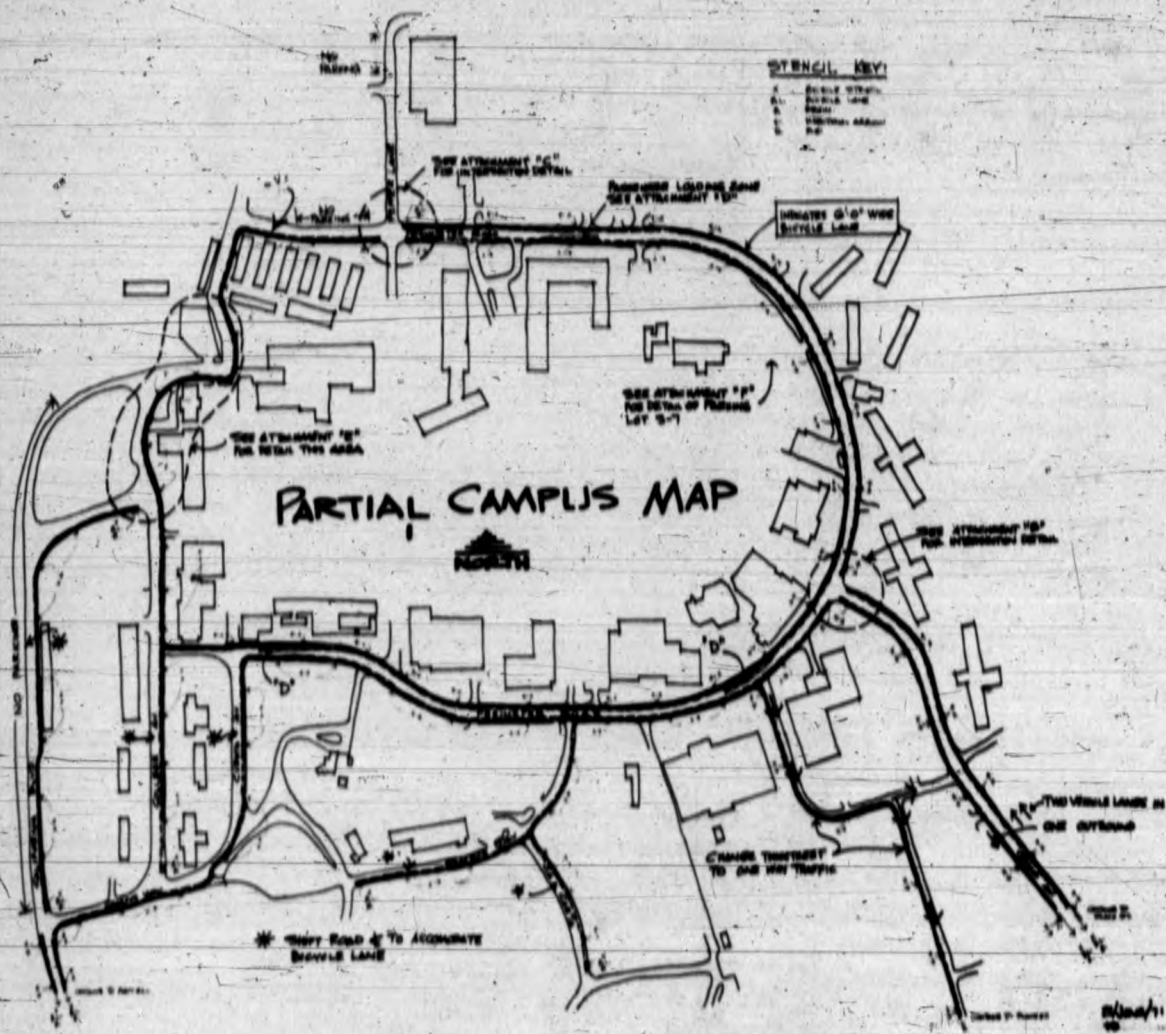

The restriping will include Grand Ave., California Blvd., North and South Outer Perimeter Roads and College Ave. Temporary stopping zones, left turn lanes and other safety features will also be installed.

The construction of the bikes lanes is under the direction of George Cockriel, and his staff. The construction includes striping the street surface to indicate bike lanes and intersections, and stenciling of new signs for pedestrians and motorists.

There will also be a change for motorists using the Grand Ave. entry. Restriping will provide two incoming (northwest) vehicle traffic lanes and one outgoing (southwest) traffic lane, to accommodate early morning rush-hour traffic.

The bike lanes will occupy six feet on either side of Outer Perimeter Road and Grand Avenue and one side of the other streets. Two-way traffic will be permitted in all bike lanes.

Dean Gerard said he believes that the college's action will not only increase bicycle use on campus, but will encourage the development of similar bike lanes on city streets leading to the campus.

Give SLO air a rest

"Give the Air a Rest Day" will begin today at 5 p.m. at the City Hall.

The activity planned is a bike ride around town—an attempt to relieve San Luis of excess smog.

This monthly event to give the San Luis Obispo air a rest is sponsored by the recently formed bicycle clubs. For more information call John Hoyt at 544-6003.

Cabaret: Opens July 28

The production "Cabaret" will open July 28 at the Pacific Conservatory of the Performing Arts at Allan Hancock College in Santa Maria.

Laird Williamson has returned to direct Cabaret, the spicy story about the decadent society of Berlin in 1930. Williamson is the guest assistant professor in acting and guest actor at the University of Texas.

Theatre goes will find the

production bizarre, grotesque and inhabited with brassy, wanton, carefree people living in a world doomed to die. Some members of the audience may find themselves comparing trends and moods of today. This decadence which ultimately laid open the way for Hitler and his regime.

"Mature audiences will see beyond the crass world which we present to a core of biting truth.

Truth is often harsh but artistically we cannot back down," said Williamson.

However, the play is not all decadence there are many tender, warm moments. It is the

kind of show that has a little something in it for everyone.

Cabaret is one of the most acclaimed musicals of our time and has been hailed "...a sparkling ingenious musical."

Jobs offers Part III from across the nation

The opportunities listed with the Placement and Financial Aid office are listed below. The position title and address of the organization are given if you wish to inquire about the job. Further information can be obtained from the Placement office.

Assistant Ranch Manager: Mr. Delbert Reese, T Lazy S Ranch, Battlemountain, Nevada.

Electrical Engineer: Ken Sorby, Administrator Employment, Martin Marietta Corporation, P.O. Box 1681, Vandenberg AFB, California, 93437.

Assistant Plant Manager: Mr. Martin, Knudsen Frozen Food Company, 1319 South Blosser Road, Santa Maria, California.

Water Plant Operator: East Bay Municipal Utility District, 2127 Adeline Street, Oakland, California, 94623, 836-3000, ext. 237.

Industrial Engineer: Bill Masuda, G. E. Medical Systems, 7802 W. Waterford, Milwaukee, Wisconsin, 53230.

Farm Foreman: County of Los Angeles, Civil Service Commission, Room 493, Hall of Administration, 223 North Grand Avenue, Los Angeles, California, 90012.

Administrative Services Officer I: University of California Campus Personnel Office, Santa Cruz, California, 95060, (408) 429-2011.

Assistant Business Manager I: University of California, Campus Personnel Office, Santa Cruz, California, 95060, (408) 429-2011.

Engineer: North American Phillips Corporation, Martin G. Wolfert, Director, Management Development and Executive Staffing, 100 East 42nd Street, New York, New York, 10017.

Final Part. Today's Indians perceiving a certain falling apart of our modern day society are becoming freshly attuned to their own ancient culture. They are banning together in a new solidarity as a family of Indians made up of every tribe in our nation. This new found union and the power that arises from it was totally lacking in the makeup of the Chumash Indians that once lived in the San Luis Obispo area.

Unlike the Indians of the great Plains the Chumash did not band together as a tribe or nation. From reports of the early Spanish settlers it has been determined that the Chumash's only true allegiance was to his immediate family. The people could only be identified as a tribe

Engineer-Semiconductors, Manager-Level: North American Phillips Corporation, Martin G. Wolfert, Director, Management Development and Executive Staffing, 100 East 42nd Street, New York, New York, 10017.

Electronic Engineer: North American Phillips Corporation, Martin G. Wolfert, Director, Management Development and Executive Staffing, 100 East 42nd Street, New York, New York, 10017.

Person to do back-up Advertising and Merchandising: Mr. Howard Isham, Manager, Santa Barbara Home Improvement Center, 415 E. Gutierrez, Santa Barbara, California.

Acting Assistant to the Chancellor—Minority Affairs: University of California, Personnel Office, Room 4121, Administration Building, Santa Barbara, California.

The Vanished People

by Brian McGuinness

through their common Hoka language and cultural traits.

There was no central tribal organization or strong individual leadership on the central coast of California. The Chumash villages that once stretched from Ventura to north of Morro Bay were totally independent from each other.

At the village level, however, the Indian men initially chose a chief who did not have any political power, but who was obliged during wars or trouble to gather the tribe together for defense. During times of peace his rule was imaginary—he was more of a master of ceremonies at celebrations than a disciplinarian or leader as were the Plain's Indians powerful chieftains.

Unlike today's highly specialized and dependent life, the Chumash of our area were

highly generalized people with the only major division of labor being the man and the woman.

Each member of a family had their own jobs to do. At certain times of the year, however, the village would join together to gather acorns or to fish during the run of Steelhead Trout or Tuna off the coast, but most of the time the collection of food was a family affair.

Since the Chumash had no great loyalties to their tribe or chiefs and cared only for their families they could offer no solid resistance to the influx of Spanish, Mexican and finally American peoples who invaded their ancestral lands. Lacking the know how of organization, the Chumash faded away into total extinction in a little over four hundred years. The people and their rich culture died without a whimper—lost before any concern

could reverse the dying process—people vanished forever.

Vestiges of the Chumash can be found in our area at the Old Mission Museum, Chumash Indian Research Center at Cuesta College, Ruth Museum in Lompoc, Museums of Natural History at Morro Bay State Park and Santa Barbara.

In closing, I think it is appropriate to quote Ralph Andrist his book *The Long Death*. "The Indian of the Old West was a creature of the other side of the frontier, the dwindling side, and when it finally pinched out, there was no place left for him. He became in truth the Vanishing American, and it was a long time before any bright spots began to appear on his future. There still are not anywhere near enough of them." END

Campus facts: did you know . . .

There are two "Cal Poly" colleges in California. One, at Pomona, is under a different administration than the older college at San Luis Obispo.

Cal Poly's Agricultural enrollment increase every year is unlike the trend nationally which is a decrease in numbers.

"Size" of State Colleges is misleading: Cal Poly at San Luis Obispo has more than 4,000 acres of land while Cal Poly at Pomona has under 300.

The Placement Office at Cal Poly says that well over half of the student enrollment works at either full-time or part-time jobs.

More than half the enrollment at Cal Poly is comprised of transfers from two-year community colleges. The trend is increasing.

Doors in the Computer Science Building are being removed due to possibilities of fire hazards.

Dramatists...

The damsel in distress (above) is played by Nevada Barr. Her attackers are played by Richard Carriger (left) and SKTEVE Gary (right).

Above right, the Maid (Ninou Lake) and the Noisemaker (Suzanne Gabig) fend off the advances of the Giant (Steve Gary).

Below right, the Noise-maker (Suzanne Rabig) trumpets the announcement of the beginning of the story.

...perform for kids

Drama students from this school are going to challenge a new audience, one with an extremely low educational level. The level, however, corresponds to the age level.

Children in the San Luis Obispo area will be entertained by students of the applied theater practices course taught by Robin Lake of the Speech Department faculty.

The audience won't be the only unusual aspect of the performances. The setting will be, too. The dramatists will be working on the playgrounds of six elementary schools in San Luis Obispo.

The five-week series of performances are scheduled for two Morro Bay schools as well as a performance in the San Luis Obispo City Library.

The two plays consist of three-acts. "The Brave Little Tailor" tells the story of two maiden queens who are saved from the giant by the little tailor. The other play, "Androcles and the Lion," describes the adventures of a slave who befriends a lovely girl.

The performances are open to all children and there will be no admission charge.

Guest tells club's past

An interesting and informative discussion was prompted by Harold Miossi, Chairman of the San Luis Obispo County Sierra Club, last Thursday in the CU.

Miossi gave a brief recap of the Sierra Club's history by relating the club's founder was John Muir the famous California explorer was John Muir, the famous California explorer and naturalists. Thirty-five national chapters existed formerly to bring people in touch with nature by organizing hikes. This objective has changed. The club is now concentrating on conservation, ecology and the implementation of laws to prohibit the misuse of lands.

Miossi has been in the organization since 1960. A native of the county, he joined because of his concern for the preservation of nature.

A local project of the club is to convince the Forest Service that 22,000 acres around Lopez Canyon should be designated as a "wilderness area." If the Sierra Club succeeds with its stand no development would be allowed in the area.

The speaker stressed the "interrelation of species" concept. He said that open space is a critical factor in our existence.

"People must have green spaces."

PG&E, the Disney Development, population distribution, water, energy, a recycling center and a stricter definition of property rights were subjects enumerated on by Miossi during a question and answer session.

Miossi concluded by stating that the club's monthly publication is available to any interested person. Also anyone who wants to get involved in the local Sierra Club should contact him for details.

Intramural Sign-ups now taken

Coach Dick Heaton of the intramural office reminds students that they do not have much longer to sign up for competition in basketball, softball, volleyball, handball, and tennis. Sign-ups have been extended to the end of this week and play will begin next week.

The basketball league will be held on Monday and Wednesday nights from 6-9, while the volleyball league will be held from 6-9 on Tuesdays.

Tennis competition will be held Monday through Thursday from 4-6 in the afternoons, and racquets and balls will be furnished for those in need.

Softball action is slated for Tuesdays and Thursday from 4-6, while a handball round-robin tournament is scheduled for July 28.

Heaton also advises that students may sign up either as a team or as an individual to be assigned to a team.

Wheeler: I want to coach until I'm 60

by Steve Gale and Rick Knepp
Staff Writers

"A lot of people have administrative goals in mind when they enter my profession, but I want to coach until I'm 60," said Ernie Wheeler.

Poly's assistant basketball coach expresses his dedication, and a look at his duties tells the story.

During the basketball season, Ernie Wheeler spends close to 4 1/2 hours on the floor each day between the freshmen and the varsity. In his two years at Cal Poly, Wheeler has proven himself in turning out the most successful freshmen team in the history of the school this past season, winning the conference freshman title with a 21-4 season record.

Wheeler's freshmen had a 17-game winning streak over the past two years in addition to a 22-home game winning streak that was snapped by the University of San Diego 66-65 in the final home game last season.

Wheeler, ready to begin his eleventh year in coaching, arrived at this campus from Magnolia High School in Southern California where he coached for seven years. He

compiled a 113-64 win-loss basketball record and took his last two teams to the California Interscholastic Federation playoffs while ranking among the top 10 teams in Orange County four of his five years as head mentor.

Wheeler also coached junior varsity baseball, cross country, and golf in addition to his basketball duties at Magnolia.

A native of California, Wheeler attended Lynwood High School where he played two years of basketball and one year of baseball. He was graduated in 1963.

His two years in the Army included 13 months duty in Korea.

A student at Compton College from 1966 to 1968, he pitched for two years on the baseball team and played two years of basketball. Wheeler was second team all-league in his freshman year, and as a sophomore he was co-Most Valuable Player of the Western Conference and first team all-Southern California Junior College.

While earning a Bachelor of Science degree in physical education at the University of Washington (1961), he earned two

basketball and two baseball letters, compiling a 13-1 record as a relief pitcher.

Wheeler received his Masters of Science degree in administration of education at University of Southern California in 1966.

He began his coaching career in 1961 when he returned to Compton Junior College as assistant basketball coach for one year.

Wheeler now resides in San Luis Obispo with his wife, Mary, and their four children, Ernie, III, 12; Keith, 10; LaRea, 8; and Jennifer, 5.

In his two years on this campus, Wheeler has assisted Neale Stoner in bringing the Mustangs to a high point in the history of the school.

"We have a real fine program here at Poly," Wheeler asserted. "I really like it here. I work for an awfully good person in our athletic director (Joe Harper) and our head coach (Stoner) is great."

"I feel I have a lot of leeway as an assistant coach, more than most assistant coaches. And to be honest with you, since I've been a head coach even on the high school level, I know what it's like.

"Naturally, like all assistant coaches, I look forward to the head coaching job some day, but I am not worried about that now."

Wheeler will be devoting the majority of his time to the varsity club with Stoner in the upcoming year. He noted that Sal Cardinale, a player from this past year's varsity team, will be assisting in the handling of the freshman team.

A vintage car collector, Wheeler owns a 1915 Dodge, a 1931 Chevy, and a 1965 Corvette. He spent part of this year's vacation at a two-day show in Reno. He belongs to the Chevrolet Car Club and has won "a couple of awards" with his Chevy.

Wheeler has made his big decision in life. "I like to coach; this is the profession I have chosen. I like working with players, and I've always wanted to coach in college. Believe it or not, going from high school to college you don't make more money, you make less money. You have to start over again and work your way up, but it's what I've always wanted to do."

Next week, Mustang takes a look at Neale Stoner.

Physical educators drawn to annual summer program

Physical educators from all over the United States are expected to gather here for two weeks in August for specialized study in physical education and athletic coaching.

Two concurrent workshops in

those fields are expected to attract over 200 men and 320 women. The men will attend the 24th annual California Workshop for Physical Education and Athletic Coaching Aug. 2-13.

The workshop first began in 1947 for men teachers. In 1949 the annual California Physical Education Workshop for Women in Secondary Schools began.

Both workshops are jointly sponsored by the California State Department of Education, the California Association for Health, Physical Education, and Recreation (CAHPER), and this school.

Dr. Robert A. Mott, head of the physical Education Department here, said the workshops have

been held concurrently since 1963.

A joint session for both workshops is planned for Tuesday, Aug. 3, with a keynote speech by Dr. Richard Perry, a faculty member at the University of Southern California, and the president of CAHPER. His talk will be titled "Critics, Crisis, and Common Sense."

The workshop leaders will include such prominent coaches as Ed Bressoud, head baseball coach at De Anza College; Jim Stangeland, head football coach at Long Beach State; Dave Maggard, head track coach at the University of California at Berkeley; and Vaughn Hitchcock, head wrestling coach here.

The Women's Workshops will include classes in modern dance, track, gymnastics tumbling, flag football, archery, and yoga among others.

Bob Clark of Monterey High School will be the director of the men's workshops. Mrs. Mary Ann Coyle, an instructor in the

Arcadia School District, will head the women's program.

C. Carson Conrad, executive director of the President's Council on Physical Fitness, will be present and will be leading sessions on administration and supervision as well as on physical education.

Four units of credit may be obtained for successful completion of the two week sessions which are not open to undergraduates.

Activities to be planned for the Summer Qtr.

Want to be a part of what's going on?

The Summer Program Committee meets on Tuesdays at 4 p.m. in CU 217D. Students are welcome to come and help make plans for activities that will be of interest to students attending summer quarter.
